OVERVIEW

What is an access control system?

QUICK ANSWER

An access control system uses readers (fingerprint, card, PIN or face), a controller and electric locks to allow only authorised people through doors at permitted times, while recording every entry. Many systems also double as staff time attendance.

KEY FEATURES

Fingerprint

Convenient and hard to share; popular for staff doors and attendance.

RFID card / tag

Fast and low-cost; easy to issue and revoke in bulk.

PIN code

Simple entry, often combined with a card or fingerprint.

Face recognition

Touch-free and fast; ideal for high-traffic entrances.

Entry logs & reports

See who entered which door and when; export to Excel or PDF.

CCTV integration

Link door events to camera clips so every entry has video proof.

SPECIFICATIONS

Series overview

Series	Credentials	Capacity	Connectivity	Best for
[Standalone]	Fingerprint, card, PIN	[X,000] users	Offline / LAN	Single doors, small offices
[Attendance terminal]	Fingerprint, face, card	[X,000] users	LAN, Wi-Fi, cloud	Staff attendance
[Networked controller]	All, multi-door	[XX] doors	LAN + central software	Offices, factories, schools

Indicative information. Final model selection follows your free site survey. Specifications vary by brand and model.

FREQUENTLY ASKED QUESTIONS

Can one system handle doors and attendance?

Yes. Terminals log every punch for attendance and control the door lock.

What happens during a power cut?

We design doors to fail safely and can add battery backup.

Can I remove a lost card instantly?

Yes. Credentials are disabled in the software immediately.
